API Documentation

GET Get Customers

> 127.0.0.1:8080/take/customer

Returns list of customers.

Example Request	Get Customers

```
curl --location --request GET '127.0.0.1:8080/take/customer'
```

GET Get Customer

> 127.0.0.1:8080/take/customer/{{id}}

Returns the customer with the specified Id.

Example Request	Get Customer

```
curl --location -g --request GET '127.0.0.1:8080/take/customer/{{id}}'
```

POST Add Customer

> 127.0.0.1:8080/take/customer

Adds a new customer

≡

BODY raw

```
{
    "firstName": "XYZ",
    "lastName": "ZYX",
    "phoneNumber": "123432143"
}
```

Example Request   Add Customer

```
curl --location --request POST '127.0.0.1:8080/take/customer' \
--data-raw '{
    "firstName": "XYZ",
    "lastName": "ZYX",
    "phoneNumber": "123432143"
}

'
```

PUT Edit Customer

127.0.0.1:8080/take/customer

Replaces data for specified customer with given data.

BODY raw

```
{
    "customerId": "2",
    "firstName": "ZZZ",
    "lastName": "XXX",
    "phoneNumber": "123432143"
}
```

Example Request   Edit Customer

```
curl --location --request PUT '127.0.0.1:8080/take/customer' \
--data-raw '{
    "customerId": "2",
    "firstName": "ZZZ",
    "lastName": "XXX",
    "phoneNumber": "123432143"
}'
```

DEL Delete Customer

127.0.0.1:8080/take/customer/{{id}}

Removes customer with a given id

HEADERS

customerId

1

Example Request   Delete Customer

```
curl --location -g --request DELETE '127.0.0.1:8080/take/customer/{{id}}'
```

GET Get Customer Orders

http://127.0.0.1:8080/take/customer/{{id}}/orders

Returns list of orders for customer with given id.

Example Request   Get Customer Orders

```
curl --location -g --request GET 'http://127.0.0.1:8080/take/customer/{{id}}/orders'
```

☰

GET Get Ingredients

127.0.0.1:8080/take/ingredient

Returns list of ingrediends

Example Request	Get Ingredients

```
curl --location --request GET '127.0.0.1:8080/take/ingredient'
```

GET Get Ingredient

127.0.0.1:8080/take/ingredient/{{id}}

Returns ingredient with given id.

Example Request	Get Ingredient

```
curl --location -g --request GET '127.0.0.1:8080/take/ingredient/{{id}}'
```

POST Add Ingredient

http://127.0.0.1:8080/take/ingredient

Adds ingredient with a specified data.

BODY raw

```
{
    "name": "serek"
```

```
}
```

Documentation Settings ▼

Example Request   Add Ingredient

```
curl --location --request POST 'http://127.0.0.1:8080/take/ingredient' \
--data-raw '{
    "name": "serek"
}'
```

PUT Edit Ingredient

```
http://127.0.0.1:8080/take/ingredient
```

Replaces ingredient with specified id with given data.

BODY raw

```
{
    "ingredientId" : 1,
    "name": "maslo"
}
```

Example Request   Edit Ingredient

```
curl --location --request PUT 'http://127.0.0.1:8080/take/ingredient' \
--data-raw '{
    "ingredientId" : 1,
    "name": "maslo"
}'
```

DEL Delete Ingredient

```
http://127.0.0.1:8080/take/ingredient/{{id}}
```

Deletes the ingredient with given id.

≡ Example Request   Delete Ingredient ▼

```
curl --location -g --request DELETE 'http://127.0.0.1:8080/take/ingredient/{{id}}'
```

GET Get Meals

http://127.0.0.1:8080/take/meal

Returns list of meals

Example Request   Get Meals

```
curl --location --request GET 'http://127.0.0.1:8080/take/meal'
```

GET Get Meal

http://127.0.0.1:8080/take/meal/{{id}}

Returns meal with given id.

Example Request   Get Meal

```
curl --location -g --request GET 'http://127.0.0.1:8080/take/meal/{{id}}'
```

POST Add Meal

http://127.0.0.1:8080/take/meal

Adds meal with given data

BODY

BODY raw

```
{
    "name": "boczek",
    "price": 14,
    "vegan": 0,
    "vegetarian": 0
}
```

Example Request   Add Meal

```
curl --location --request POST 'http://127.0.0.1:8080/take/meal' \
--data-raw '{
    "name": "boczek",
    "price": 14,
    "vegan": 0,
    "vegetarian": 0
}'
```

PUT Edit Meal

http://127.0.0.1:8080/take/meal

Replaces meal with given data.

BODY raw

```
{
    "mealId": 1,
    "name": "kaczka"
}
```

Example Request   Edit Meal

```
curl --location --request PUT 'http://127.0.0.1:8080/take/meal' \
--data-raw '{
    "mealId": 1,
    "name": "kaczka"
}'
```

☰   Documentation Settings   ▼

DEL Delete Meal

    http://127.0.0.1:8080/take/meal/{{id}}

Removes meal with specified id.

Example Request   Delete Meal

```
curl --location -g --request DELETE 'http://127.0.0.1:8080/take/meal/{{id}}'
```

GET Get Meals Quantities

    http://127.0.0.1:8080/take/meal/{{id}}/quantities

Example Request   Get Meals Quantities

```
curl --location -g --request GET 'http://127.0.0.1:8080/take/meal/{{id}}/quantities'
```

GET Get Orders

    http://127.0.0.1:8080/take/order

Returns list of orders.

Example Request   Get Orders

```
curl --location --request GET 'http://127.0.0.1:8080/take/order'
```

☰   Documentation Settings   ▼

GET Get Order

    http://127.0.0.1:8080/take/order/{{id}}

returns order with specified id

Example Request   Get Order

    curl --location -g --request GET 'http://127.0.0.1:8080/take/order/{{id}}'

POST Add Order

    http://127.0.0.1:8080/take/order

Creates a new order and connects it with customer with given id in data.

BODY raw

```
{
    "customerId": {
        "customerId": 1
    },
